RosettaNet Community Update

A New Home for the RosettaNet Standard in 2012

We would like to share some exciting news with you regarding upcoming changes to the RosettaNet program. These changes reflect the business needs of today's High Tech and Electronics industry, whose focus has shifted in recent years to standards implementation support and maintenance. In effect, the member community has achieved its mission – since RosettaNet's inception 13 years ago – of developing a robust set of processing standards that through adoption and usage, continue to change the way industry does business.

It was industry that drove RosettaNet and industry is now showing strong interest in the launch of the GS1 US High Tech and Electronics initiative, which is set to begin on January 1, 2012. The RosettaNet brand will be maintained by GS1 US, along with on-going community support. GS1 US will continue to maintain and support RosettaNet standards for the foreseeable future. A forum to address the industry's current and future business needs will carry on within a broader industry engagement team at GS1 US.

The RosettaNet Standard will remain free and open to the public.

Please address any questions or concerns to Debra Praznik, DPraznik@GS1US.org or Hussam El-Leithy, Hel-Leithy@GS1US.org.

Asia B2B Plenary
10 -11 November 2011

Asia B2B's 5th Plenary on "e-invoicing: Show Us the Money"" was held at Intel Penang's manufacturing location. Co-hosted by Seeburger and Intel, more than 50 attendees participated in the event.

Intel presented "The Benefits of e-Invoice" using RosettaNet invoice and payment advise PIPS numbers 3C3 and 3C6. Transaction volume as of October 27th was 411,672 invoices and 32, 682 payment advise.

Seeburger (SP) shared "E-invoice: An Introduction and Reference" providing guidance and recommendations for effective e-invoicing implementations.
